

Calgro M3 – FY21 Results

Date: 21 May 2021

Key message: A significant recovery in 2H as the business stabilises and development activities resume. A strong pipeline of units under construction supports revenue growth into FY22.

- Calgro released FY21 results. The 2H FY21 result showed a significant recovery over 1H which suffered a COVID-related three-month construction stoppage (gross profit R76.7m vs R31,3m and gross profit margin 15.9% vs 7.9%).
- The simplification of the business model is essentially complete:
 - close the construction division (cost of R12.9m)
 - exit all provinces except Gauteng and Western Cape
 - sale of non-core projects
- Debt levels at R958m reduced from R1 069m, with debt maturities spread across six years. All debt is floating.
- Calgro has 4 654 units under construction (up from 2 393 in FY20) and 32 590 available opportunities. Little long-term investment is required to capitalise on this pipeline – a period of “harvesting” can occur over the next few years without significant impact on longer-term growth prospects.
- Memorial Parks are contributing meaningfully and the burial opportunity pipeline is 59 366 (1 542 completed in FY21). Improved marketing is driving strong growth in demand (excluding any Covid impact).
- Calgro is traditionally very conservative on accounting for book value – everything is on the balance sheet at cost and this does undervalue the property portfolio by approx. 40%.
- Land invasions remain a risk, but risk mitigation measures have been effective in recent land invasion attempts.
- To value Calgro we place the property portfolio on a 40% discount to the market-adjusted NAV (this equates to a 12% discount to the accounting book value of R1.34bn).
- Our Target Price for Calgro is R7.06. Calgro is trading at a significant discount to realisable NAV.

Valuation

- We value Calgro M3 on a Sum-of-the-Parts basis, using a combination of NAV (residential property development portfolio) and EBITDA multiples (Memorial Parks) to value the operational divisions.

Figure 2 Valuation (using FY22 EBITDA)

| ZARm | Comment | FY22 EBITDA | EV/EBITDA Multiple | Enterprise Value |
|----------------------------------|---------------------------------------|-------------|--------------------|------------------|
| Memorial parks | 3-5X multiple for annuity-type income | 57 | 4.0x | 229 |
| Enterprise Value | | 57 | 4.0 | 229 |
| | | NAV | Discount | |
| Residential Property | NAV | 1970 | 40% | 1182 |
| Kwanobuhle | NAV | 225 | 20% | 180 |
| Other investments | From balance sheet | | | 70 |
| Minorities | From balance sheet | | | (0) |
| Net (debt)/cash | From balance sheet | | | (790) |
| Equity value | | | | 872 |
| Number of shares ('m) | | | | 123.5 |
| Valuation (ZAR per share) | | | | 7.06 |

Source: Company data, Chronux Research estimates

- **Residential Property Developments:** we value this division on a NAV basis given the nature of the property development model.
- Calgro is traditionally very conservative on accounting for book value – everything is on the balance sheet at cost and this does undervalue the property portfolio by approx. 40%.
- Management does provide their market-adjusted valuation for the property portfolio. We believe that the values provided are realistic and based on recent sales experience.

Figure 3 Residential Property Development NAV

| Opportunities | Total No. | Effective No. | Market Value (ZAR) | Total (ZAR) |
|---|--------------|---------------|--------------------|----------------------|
| Mid to high-end portfolio - serviced and unserviced land | 765 | 765 | 349,326 | 267,234,390 |
| Low to mid-end portfolio - serviced opportunities | 10624 | 10200 | 119,670 | 1,220,589,124 |
| Partially serviced and unserviced opportunities | | | | |
| - projects underway | 9577 | 7998 | 48,000 | 383,894,400 |
| - projects not started | 11624 | 5812 | 16,944 | 98,478,528 |
| Total | 32590 | 24775 | 533,940 | 1,970,196,442 |
| KwaNobuhle and KZN development land to be sold | | | | 225,000,000 |
| Total property portfolio | | | | 2,195,196,442 |
| Construction contracts | | | | 362914817 |
| Infrastructure | | | | 12,995,031 |
| Serviced land | | | | 21,816,854 |
| Land and related cost for future contract asset | | | | 445,392,350 |
| Inventories excluding Memorial Parks | | | | 456,994,618 |
| Investment in joint ventures (excluding Residential Rental Investments) | | | | 37,066,691 |
| Balance sheet costs of property portfolio | | | | 1,337,180,361 |
| Additional value not in balance sheet | | | | 858,016,081 |

Source: Company data, Chronux Research estimates

- The adjusted property portfolio valuation adds R858m to the book value of Calgro of R1.34bn.
- The Price/Tangible Book Value for Calgro and peer Balwin Properties is shown in the following chart.

Figure 4 Price to Tangible Book Value

Source: Company data, Chronux Research estimates

- Calgro has traded at a Price/Book well above the current 0.43 times, and we do not believe that this is a justified valuation.
- Balwin Properties is currently trading at a Price/Book of 0.69. The two companies are similar in basic structure but differ in the target market, with Balwin focussing on a higher market segment (R750k – R2m).
- Calgro is arguably in a stronger market segment, with Balwin shifting development focus to lower income segments.
- We believe that a 40% discount to the market-adjusted NAV of R1.97bn is appropriate for Calgro's property portfolio (this equates to a 12% discount to the accounting book value of R1.34bn).
- The Kwanobuhle and other KZN property is included at R225m based.
- **Memorial Parks:** we value the Memorial Parks on an EBITDA multiple basis as the business follows a simpler inventory/sales model. We believe that the relatively stable and growing revenue stream should attract at least a 4x EBITDA multiple.
- **Net debt:** net debt is currently R790m.

Key Risks to Valuation

- **Upside:** increased government use of private sector to deliver subsidised housing and land/infrastructure funding assistance, converting current pipeline to sales with minimal extra development costs, Memorial Park growth.
- **Downside:** further land invasions, locking up cash in property and infrastructure for too long, government inactivity in housing.

Land Invasion Risk

- Calgro has experienced land invasions/attempted land invasions over recent years, with the latest attempt in January 2021.
- This is a serious risk that has had a significant impact on costs and development progress.
- Land invasions occur where the perception is that units are government funded. For Calgro this is generally the RDP/CRU units. General community anger over the slow government housing program is mixed with a criminal element.
- Calgro has developed a stable response to land invasions and through experience is now able to better protect and/or remove illegal invaders immediately.
- Risk mitigation measures include:
 - Increased security on all sites under development – this is costing R2.5m per month
 - Surveillance of all undeveloped properties on a daily basis
 - Retainer agreement with Red Ants and security companies to have immediate capacity available if required (within one hour)
 - Interdict obtained for the whole of Fleurhof to prohibit illegal occupation
 - Legal teams permanently on standby to obtain urgent court action if required
 - Engagement with local councillors and metros to assist with community meetings and interaction
 - Informant network early warning system
- Calgro has very good relationships with municipalities and recent invasions have been dealt with quickly and efficiently.
- Calgro is also reducing its exposure to government funded work and being careful not to market itself as such.
- Risk mitigation measures have been effective in recent land invasion attempts.

Debt

- Calgro has relatively high debt (net debt: equity of 0.99 times on 28 February 2021). The DSCR was comfortable at 1.4 times.
- Calgro has a mix of corporate debt and two loans from development agencies Proparco and the NHFC.
- Corporate debt makes up 40% of debt, with a Proparco loan (R387m) and NHFC facility (R215m) making up the remainder. All debt is variable.
- Short-term debt has been restructured in the interim period (it was high at the end of FY20) and the debt maturity profile now looks relatively comfortable.

Figure 5 Calgro Debt Maturity

Source: Company data, Chronux Research estimates

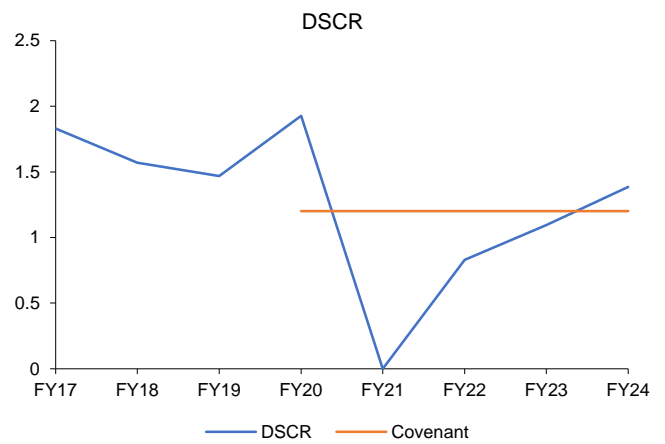

- All debt is accounted for as a current liability due to the accounting treatment of the operating cycle (working capital, construction contracts and work in progress up to 10 years). Debt due in the next 12 months (to Feb 2022) is only R107m of the total debt of R958m.
- Calgro is well within Net debt/ Equity covenants with little risk of breach.

Figure 6 Net debt: Equity

Group History and Strategy

- Calgro is a developer of low- to middle income housing.
- Experience over the years has taught Calgro to operate on the following basic principles:
 - Don't buy expensive land
 - Don't rely on government subsidised housing

Difficult last three years

- Calgro has had a difficult three years from FY18 to FY20 as several exogenous factors impacted the progress of the development pipeline and added significantly to costs.
- Key developments were:
 - Land invasions at flagship Scottsdale and Fleurhof sites
 - This resulted in increased security costs and damages
 - Delayed electrification at Fleurhof causing standing time
 - Closure of the in-house construction company
 - Fixed costs too high and scale too small to justify in-house operation
 - Construction managers retained
 - Lack of working capital to commence construction on projects
 - Reduced sales as a result but capex very low
 - Construction recommenced in January 2021
 - Construction commencing where bulk sales exceed 50% of block or government purchase
 - Access to capital easing
 - Increased use of client balance sheet for construction
 - R1.6bn of working capital is required for the approx. 6600 serviced stands (assuming 50% funded by client balance sheet)
 - Construction starts only on bond issuance (free-standing units) or 70% sales of a sectional title development
 - High overheads
 - Cost reduction evident in recent results
- Extra costs due to the above factors caused a cash burn of R485m and debt increased by R478m over the three-year period.
- Management was forced to suspend work to manage cashflow. Fortunately, the diversity of the development pipeline meant that sales did not stop during this period as units were available for sale.
- However, there were opportunity costs associated with this as sales and marketing momentum slowed down.
- FY20 was a year of consolidation – exiting the rental JV and the rental business, closure of the construction business (outsourcing has a minimal impact on margins), the residential development portfolio was slimmed down, and costs were reduced.

Start of recovery in 1H FY21

- Cash generation was strong in 1H FY21 (without asset sales) and with the restructuring of the debt maturity profile Calgro is now able to start to increase capex on the property development pipeline.

- Management is still being cautious on the development pipeline and has a conservative forecast for the resumption of property development and sales.
- The current ratio of sectional title: free-standing units is approx. 50:50, but Calgro is moving to a 90:10 model due to stronger demand in that segment.
 - Free-standing units are more profitable (approx. 50% margin on a R1m house – costs are roughly R250k land and R250k construction)
 - Cash is received for bonded free-standing units upfront for the land and on a draw-down basis through construction
 - Sectional title developments are more working capital intensive as cash is only received on sale and registration of the unit
- The accounting treatment for the different models is shown in the following table.
- Sectional title developments are more working capital intensive as all costs are borne by Calgro until the point of sale.
- Freestanding developments generate cash flow on the sale of the land and then on a draw-down basis during construction.

Figure 8 Accounting Treatment of Residential Housing

| Income statement | Cash Flow |
|---|---|
| <u>Freestanding:</u> | <u>Freestanding:</u> |
| Land - revenue and associated costs recognised on registration | Land - cash received upfront before building |
| Building - % of completion method | Building - cash draw against bond |
| | |
| <u>Sectional Title:</u> | <u>Sectional Title:</u> |
| Accounting revenue and costs recognised on registration of unit (associated costs include construction, land, services etc) | Cash received only after full construction and registration of unit in clients name |
| Costs capitalised in Construction Contracts until registration | |

Source: Company data, Chronux Research estimates

RDP Housing

- Calgro has benefitted from government subsidies, infrastructure grants and purchases of units. This has varied over time and recent years has seen a reduction in government contribution, which has had an impact on Calgro's balance sheet as more of the development is now funded privately.
- However, Calgro still sells a reasonable portion of units to government for the different social housing schemes and most Calgro developments incorporate affordable/social housing into the mix.
- This does allow Calgro to recover some of the infrastructure costs for the whole development. While profitability on the affordable/social housing may be low, it does absorb some of the project overheads and increases the profitability of the remaining units sold into the private market.
- The RDP housing program has been running for many years, providing free houses to people who qualify according to a means test.
- However, in December 2020 the Minister of Human Settlements announced changes to the RDP housing program, ordering provincial government to immediately scale down on free housing projects.
- The focus will shift to handing out serviced sites where people can build their own homes.
- The Minister acknowledged failures and unintended consequences of the free housing program.

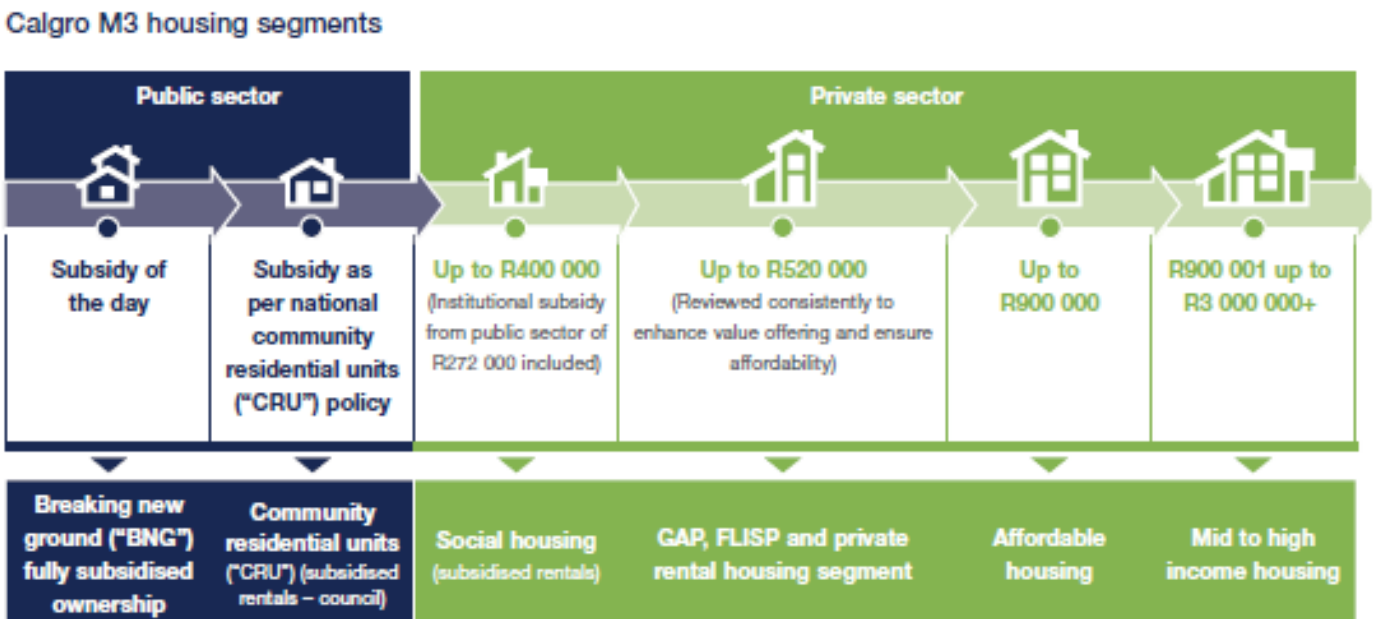

- Housing projects will now only be supported if they benefit the elderly, child-headed homes, people living with disabilities, and military veterans.
- Government will still buy houses from private developers for the various housing schemes.
- It does appear if the onus has shifted to the private sector to develop and fund housing projects, with government as a customer as opposed to a client.
- We believe that Calgro is well positioned for this. The company has built up strong relationships with local government and the type of development done by Calgro is in line with government housing requirements.
- However, Calgro should be seen as a private sector developer with government being a relatively small customer at the low end. Calgro's experience is to not rely on government grants or subsidies but to use them when available. Each development is sustainable as a private sector development and Calgro is now sustainable without public sector support.
- We do believe that sales to the public sector will maintain and there is a possibility that they increase as government winds down the RDP program (and associated direct tenders to construct RDP housing).

Divisional Overview

Residential Property Development

- This division is a developer of residential projects from land procurement to sales of units.
- Calgro operates primarily in the subsidised and affordable housing sector. This is the largest contributor to Calgro’s revenue.
- Calgro operates in the lower-to-middle segment of the residential property market. The average price of a Calgro home is approx. R450k.
- Calgro is effectively a private sector developer - public sector housing is a small and declining part of the business, although developments cater for government subsidised purchases and rentals.
- Calgro has shifted back to a simple development model that worked well previously. Development projects have been reduced from 15 to 7 over the past year, with a geographic focus will be on the faster growing Gauteng and Western Cape regions.
- Gross profit margin expectations are above 20% for this division – this was last achieved in FY17. Management believe that the restructuring and simplification of the portfolio should result in gross margins in excess of 20% again.
- The price range that Calgro operates in is R250k – +R1m.
 - Average price is approx. R450k (this does depend on the mix sold)
 - Growth is being seen in the sub-R500k market

Figure 9 Calgro M3 Housing Segments

Source: Company data, Chronux Research estimates

- Fully subsidised housing (RDP or BNG) cost approx. R195k with a R30k geotechnical allowance.
- Social and CRU housing is at levels of approx. R400k.
- Peer companies like Balwin Properties (who operate in the higher end – average price of Balwin units in FY20 was approx. R1.2m) have stated that they are moving down into the more affordable categories as that is where demand is strongest.
- Balwin has discontinued its upper end (Signature) offering due to weak sales.

Figure 10 Balwin Properties Avg Price per Unit

| FY20 | Avg Price (R000) | Units | Revenue (Rm) |
|------------------|-------------------------|--------------|---------------------|
| Classic | 1180 | 2191 | 2585 |
| 1-bed | 860 | 1071 | 921 |

| 2-bed | 720 | 159 | 114 |
| 3-bed | 819 | 290 | 238 |
| Total | 1169 | 2981 | 3486 |

Source: Company data, Chronux Research estimates

- The division has had a difficult two years as Calgro initially suspended operations on various sites to preserve liquidity and the Covid-19 lockdown caused two months of complete inactivity.

Development pipeline

- Calgro has an extensive pipeline of property projects at various stages of development. All projects outside of Gauteng and Western Cape are being exited.

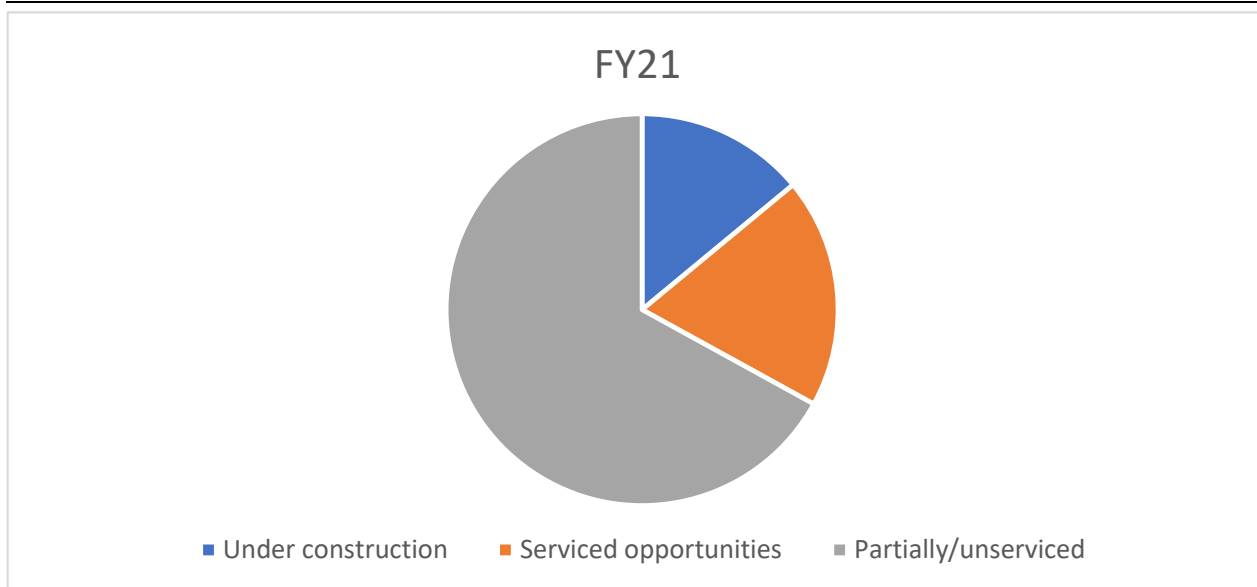

Figure 11 Property Projects

Residential Property Developments

| Project | Municipality | Region | Government /private | Progress | No. units /remaining units | Anticipated turnover (Rm) |
|------------------|---------------------|---------------|----------------------------|-------------------|-----------------------------------|----------------------------------|
| Belhar | Cape Town | Western Cape | Private/public | Under development | 4621 | 1721 |
| Bridge City | eThekwni | KwaZulu-Natal | Private | All units sold | 356 | 133 |
| Fleurhof | JHB | Gauteng | Private/public | Under development | 2979 | 2359 |

Property segments

■ BNG Subsidised New Housing

- In 2004 Cabinet approved the “Comprehensive Plan for the Development of Sustainable Human Settlements”.
- Also known as Breaking New Ground (BNG) - as the updated version of the Reconstruction and Development Programme (RDP housing), the policy seeks to refocus attention on the development of sustainable human settlements, rather than just on the delivery of subsidised housing units.
- This strategy seeks to alter the housing patterns in the country by integrating communities and placing them closer to areas with economic opportunities.
- Segment targets
 - Income earners below R3 500 pm. Move to the next market segment if monthly earnings exceed R3 500.

■ CRU Housing

- The Community Residential Unit (CRU) Programme comprises subsidised rental units owned by the public sector. This rental option caters for income earners between R3 500 and R7 500 pm and excludes individual ownership.
- Segment targets
 - Income earners below R7 500 pm. Move to the next market segment if monthly earnings exceed R7 500

■ Social Housing

- Social Housing is a rental or co-operative housing option of subsidised rentals owned by Section 21 social housing institutions (SHI's).
- This rental option caters for income earners between R3 500 and R7 500 pm and excludes individual ownership.
- Segment targets
 - Provincial and institutional subsidy and private sector funding to the value of R300 000

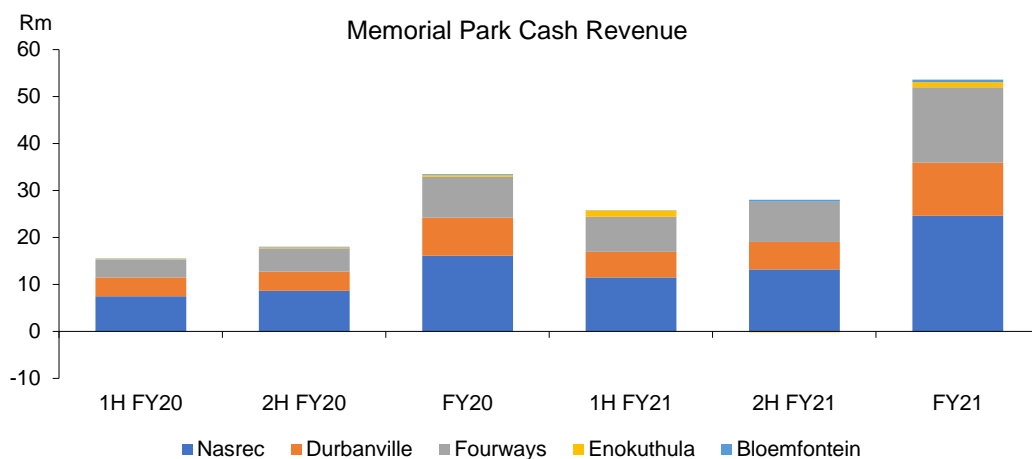

- Income earners below R7 500 pm. Move to the next market segment if monthly earnings exceed R7 500.
- FLISP Housing
 - Finance Linked Individual Subsidy Programme (FLISP).
 - The product was introduced when the affordability level of R3 500 pm income to qualify for subsidy housing was removed, allowing people previously disqualified based on income, to qualify for a partly subsidised home.
 - FLISP housing denotes the market earning up to R15 000 pm.
 - To qualify for the once-off state assisted subsidy, the prospective client will be required to qualify for a bond by one of the major financial institutions.
 - The subsidy of between R10 000 up to R87 000, depending on monthly income, is subject to certain qualifying criteria as set out by the Department of Human Settlements.
 - Segment targets
 - Income earners up to R15 000 pm. Then move on to the next market segment depending on income levels.
- GAP Housing
 - Grassroots Affordable Peoples (GAP) Homes cater for people excluded from the subsidised programme, but with incomes too low to qualify for traditional affordable homes.
 - Units in this market segment can be:
 - Freestanding
 - Full title units
 - Sectional title units
 - Multi-storey sectional title apartments.
 - Segment targets
 - Up to R450 000
 - Income earners up to R15 000 pm. Then move on to the next market segment depending on income levels.
- Affordable Housing
 - Full and sectional title residential units aimed at homeowners in the bonded market regulated by the FSC.
 - Affordable housing describes open market bonded homes with a sales value deemed 'affordable' to those that have a median income of R15,000+ pm.
 - This sector, where financial institutions provided user finance, typically comprises of unit sizes ranging from 40m² 2-bedroom units to 4-bedroom units in excess of 120m² in size, depending on clients' requirements and affordability.
 - Units in this market segment can be:
 - Freestanding
 - Full title units
 - Sectional title units
 - Multi-storey sectional title apartments.
 - Segment Targets
 - Sales values from R450 000 to R700 000
 - Income earners R15 001+
- Mid- to high income housing

- Full and sectional title residential units aimed at homeowners in the bonded market, outside the Financial Services Charter (FSC).
- Segment targets
 - Sales values from R620 001 up to R3 000 000+
 - Income earners R20 000+

Memorial Parks

- The Memorial Parks act as a diversifier against the lumpy and cash intensive Residential Property Development division. Mature Parks are Nasrec, Fourways and Durbanville, with Enokuthula only in operation since March 2020.
- The land associated with the memorial parks is all full owned by Calgro (no debt). The cash revenue less operational costs therefore flows straight to the bottom line. Operational costs are relatively low and limited to security and park maintenance.
- Revenue is received on the sale of a grave site. Calgro offers a 12-month repayment period option – with the revenue only accounted for at the end of the 12-month period. This explains the difference between cash and accounting sales.
- There is no recurring cash flow in this division – the sale of a site generates a once-off cashflow.
- Grave sites are generally purchased on death (with funeral policies commonly being used to fund the purchase), but Calgro also offer family sites that are purchased upfront and used multiple times.
- Some revenue (15-20%) is deferred for ongoing maintenance (this is amortised over a 15-year period).
 - A maintenance fund is maintained for memorial park maintenance
 - This is growing to be a self-supporting fund
- The cash generated from memorial park sales is shown in the following chart. Sales picked up in 1H FY21 as a result of Covid-19, and 2H FY21 has followed this trend.

Figure 13 Memorial Park Cash Sales

Source: Company data, Chronux Research estimates

- The land available at the memorial parks is sufficient for at least 20 years of sales.
- Other revenue includes rental of facilities at the memorial, parks (memorial plaques, church venues, function hire, office space for funeral businesses).
- Anticipated revenue from sales is shown in the following table.

Figure 14 Memorial Park Anticipated Revenue

| Project | Other Products | | | Graves | | | Total |
|----------------------------|----------------|--------------------|-----------------------------|---------------|--------------------|-----------------------------|--------------------|
| | Anticipated | | | Anticipated | | | Total |
| | Quantity | revenue (R'000) | Revenue per site (R'000) | Quantity | revenue (R'000) | Revenue per site (R'000) | revenue (R'000) |
| Nasrec Memorial Park | 2,074 | 20,470 | 9.9 | 29,160 | 934,619 | 32.1 | 955,089 |
| Fourways Memorial Park | 4,214 | 44,512 | 10.6 | 8,938 | 247,466 | 27.7 | 291,978 |
| Enokuthula Memorial Park | - | - | | 10,407 | 183,623 | | 183,623 |
| Bloemfontein Memorial Park | 31,522 | 136,045 | 4.3 | 4,938 | 62,458 | 12.6 | 198,503 |
| Durbanville Memorial Park | 2,638 | 24,872 | 9.4 | 6,537 | 166,634 | 25.5 | 191,506 |
| Total | 40,448 | 225,899 | 5.6 | 59,980 | 1,594,800 | 26.6 | 1,820,699 |

Source: Company data, Chronux Research estimates

- Gross profit margins for the division are in excess of 50%.
- Management expects steady growth in sales in the Memorial Parks division driven by a renewed marketing effort and word of mouth. Public facilities are becoming full and there are no other private memorial park developments at present.

Residential Rental Investments

- Calgro entered the rental market in 2015 to grow the business and generate annuity income.
- The Afhco Calgro M3 Consortium was constituted in 2016-2017 with Calgro selling units into a rental pool and JV partner SA Corporate Real Estate managing the rental pool. Calgro was a 49% holder of the venture with Afhco owning 51%.
- The total investment targeted was R4-5bn, creating a residential rental portfolio in Gauteng and the Western Cape. However, differences in opinion on gearing levels for the rental portfolio and different risk tolerances led to a disagreement between the two parties and led to the dissolution of the JV in March 2019.
- After settlement of the transaction and repayment of related shareholder loans, Calgro owed SA Corporate R127.8m. Calgro did get the economic benefit of the rental assets that were in the JV – free-standing houses at South Hills and the completed Fleurhof, Scottsdale and Belhar units.
- Calgro had planned to continue to operate these as rental stock but has decided to sell the rental portfolio. The business is capital intensive and Calgro has opted to monetise the rental units (NAV approx. R500m).
- There is still an interest to build up a rental portfolio for the diversity of revenue, but management do not believe the balance sheet is in the right position to allocate the type of capital required.

Accounting

Contract assets

- Calgro is conservative in the way costs and revenue are allocated.
- The value of land and all improvements are accounted for in the Balance Sheet under Inventories and Construction Contracts.
- This accounting treatment undervalues the land and improvements significantly relative to the current realisable value.
- The following excerpts are from the Accounting Policies in the Annual Financial Statements.
- **Inventories:**

- Land owned by the Group which is being developed to get into a condition to start construction of the various projects is classified as inventory. The land may also be sold without any construction depending on the intention of management. Inventories are stated at the lower of cost or net realisable value. The cost of land under development held for sale comprises design costs, building materials, indirect labour, borrowing costs and other direct costs.
 - The amount of any write down of inventories to net realisable value is recognised as an expense in the year which the write down occurs. The amount of any reversal of any write down of inventories is recognised as a reduction in the amount of inventories recognised as an expense in the year in which the reversal occurs.
 - Individual units which do not form part of construction contracts are classified as inventory and are sold as a completed unit.
- **Construction contracts:**
- Construction contracts consist of both contract assets and cost incurred to be allocated to future contract assets when the Group enters into an agreement with a customer.
 - Future costs to be allocated to contract assets are costs incurred on the development of land which includes costs such as direct labour, materials, professional/consulting services, commissions, and allocation of overhead costs which relate directly to the development of the land. These costs are only allocated to the individual units when a contract is entered into with a customer to purchase the relevant unit.
 - Contract assets arise on the basis that costs are incurred to satisfy performance obligations, the related payment and timing is determined based on each individual contract.
 - These costs include costs to fulfil a contract and includes costs such as direct labour, materials, professional/consulting services, commissions, and allocation of overhead costs which relate directly to satisfy performance obligations of the contract. Contract assets are recovered from the relevant customer when the relevant performance obligations are completed, and payment can be obtained from the customer.
 - If costs are incurred on a contract without a corresponding payment received it is shown as a contract asset at the reporting period, if the customer has paid in advance for performance obligations to be satisfied it is shown as a contract liability within trade and other payables.
 - The Group presents as a liability the gross amount due to customers for contract work for all contracts in progress for which progress billings exceed costs incurred plus recognised profits (less recognised losses).
 - Costs incurred in the year in connection with future activity on a contract are excluded from contract costs. They are presented as costs incurred to be allocated to future contract assets depending on their nature, that will be assessed on a case-by-case basis.
 - The Group presents as an asset the gross amount due from customers for contract work for all contracts in progress for which costs incurred plus recognised profits (less recognised losses) exceed progress billings. Progress billings not yet paid by customers and retention are included within “trade and other receivables”.
 - The transaction price for each performance obligation is the contractually stipulated price and represents the stand-alone selling price at the time when the contract is entered into with the customer.

Working capital cycle

- The operating cycle for inventory, construction contracts and work in progress is considered to be longer than 12 months.
- The operating cycle is generally between 1 and 10 years depending on the project size and type, which includes different typologies and infrastructure requirements.
- Accordingly, the associated liabilities are classified as current as they are expected to be settled within the same operating cycle as inventory, construction contracts and work in progress.
